

# HOW TO MAKE A KNOTTED KEYCHAIN

SPIRAL AND FLAT

**Result**

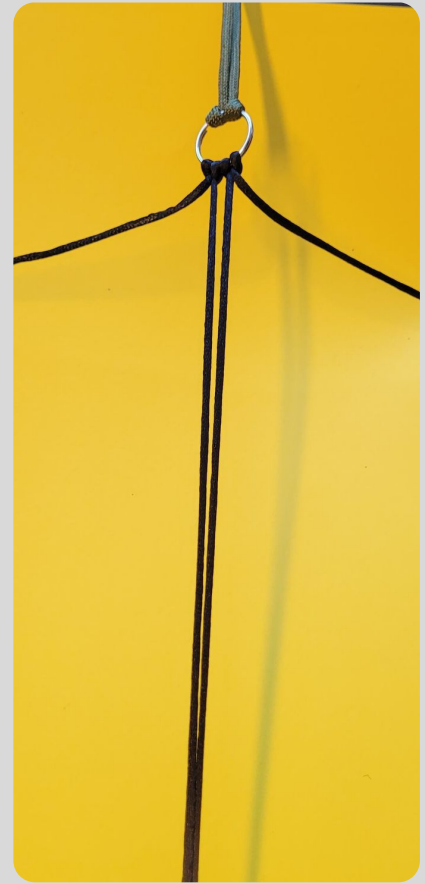

**Spiral**

**Flat**

**You will need:**

- 2 x 1m of cord depending on which length you want it to be
- A key hanger/ring
- A scissor
- Extra cord or similar to fix it while knotting

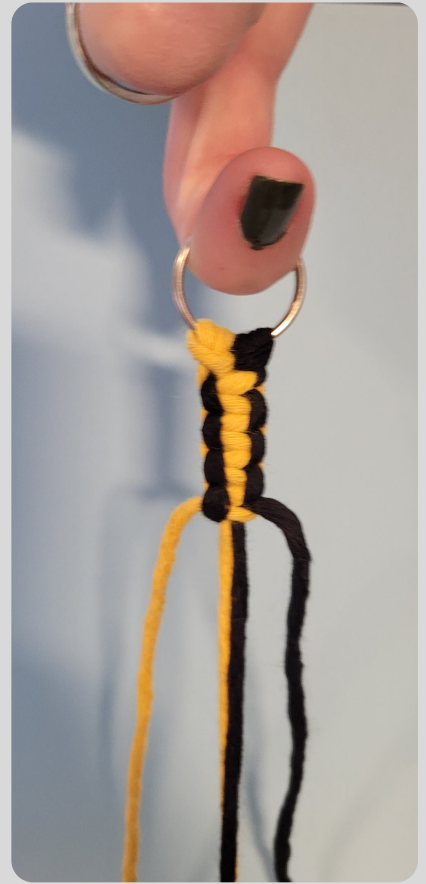

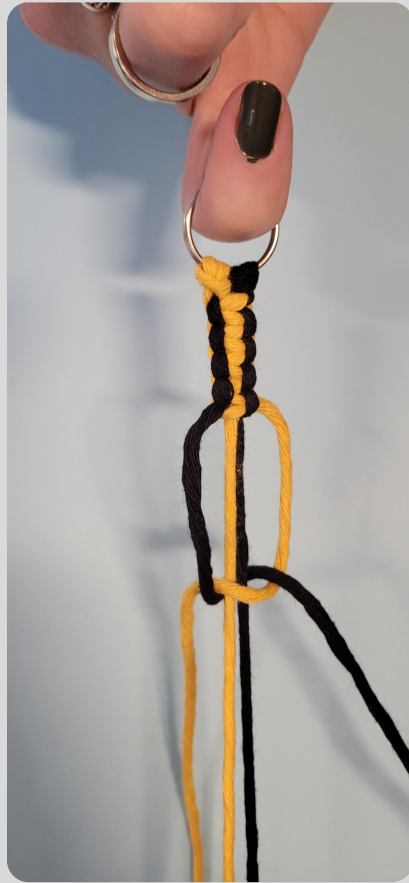

1

Find a way to fixate the key hanger/ring eg. to a chair or to your colleague's finger. Attach the two cords with a larks head knot next to each other.

2

Now make a half-knot around the two inner cords. For the spiral keychain continue making half-knots the same way and it will automatically get into shape. Stop when the keychain has the desired length.

3

For the flat keychain, start in the same way with a half knot. Now make the half knot the opposite way. After that, make the half knot the other way every other time. Stop when the keyring has the desired length.

4

Finish it by making some knots or by making a tackle. You can unravel the excess strings to achieve the result shown in the last picture. ENJOY!
